

5 Forerow Cottage Caputh Perth PH1 4JE

single survey

survey report or	survey report on:		
Property address	5 Forerow Cottage Caputh Perth PH1 4JE		
Customer	Jennifer McLean		
Prepared by	Graham + Sibbald LLP		
Prepared by Graham + Sibbald LLP			

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	The subjects comprise a purpose built, first floor flat within a terraced
	two storey block containing two flats in total.
Accommodation	First Floor: Hall, Living Room, Kitchen, Bedroom and Bathroom.
Gross internal floor area (m ²)	40
Neighbour developed and location . The subjects are situated in the utilizer of Consthe within an established	
Neighbourhood and location	The subjects are situated in the village of Caputh, within an established
	residential area comprising neighbouring properties of varied age and
	character. There is provision for everyday amenities within the nearby
	village of Murthly, with the area relying upon Perth, 13 miles distant
	for a wider range of facilities and essential services.

Age (year built)	1890

Weather	It was dry at the time of our inspection.

Chimney stacks	Visually inspected with the aid of binoculars where appropriate.
	There are mutual rendered brick chimney stacks, with metal flashings beneath.

Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where
	appropriate.
	Roof spaces were visually inspected and were entered where there
	was safe and reasonable access, normally defined as being from a 3m
	ladder within the property. If this is not possible, then physical
	access to the roof space may be taken by other means if the Surveyor
	deems it safe and reasonable to do so.
	The work comparison of a vitable distribution from supply supply divide
	The roof comprises of a pitched timber framework, overlaid with
	slates and finished with metal ridging and valley gutters.
	Access to the roof void is obtained via a ceiling hatch within the
	kitchen. Access was however restricted due to the position of the
	hatch being partially obstructed by the kitchen cabinets beneath. A
	limited "head and shoulders" inspection was possible from a standing
	ladder, however, the majority of the timbers were not inspected.

Rainwater fittings	Visually inspected with the aid of binoculars where appropriate.
	The rainwater system comprises mainly of cast iron manufacture,
	with some replacement pvc sections noted.

	-
Main walls	Visually inspected with the aid of binoculars where appropriate.
	Foundations and concealed parts were not exposed or inspected. The main walls are stone built, externally rendered.

Windows, external doors and	Internal and external doors were opened and closed where keys were
joinery	available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
	The subjects are accessed from the rear, by means of rendered brick staircase and flush panel timber entrance door.
	The windows are of replacement uPVC casement, double glazed installations.

External decorations	Visually inspected.	
Conservatories / porches	There are no structures of this type.	

Communal areas	Circulation areas visually inspected. The subjects are accessed via a rendered brick staircase. There is a conical slate covered roof, with the gutters consistent with zinc or similar metal. The walls are consistent with plastered brick, with windows of uPVC double glazed design.
----------------	--

Garages and permanent	Visually inspected.
outbuildings	
	There is a store shed to the rear contained within a terrace of similar.
	Comprising of mainly timber construction with the exception of the
	front wall which comprises of corrugated metal sheets. The roof
	comprises a pitched timber framework overlaid with slate.

Outside areas and boundaries	Visually inspected.
	It is understood that there is a private garden to the rear, laid to grass and bounded by timber fences. In addition, it is presumed that there is an area suitable for off road parking however this will require to be confirmed by reference to the Title Deeds/plans. The parking to the rear is approached via a private road, over which it is presumed the right of vehicle access is held.

Ceilings	Visually inspected from floor level.
	Plastered and decorated.

Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	Plastered and decorated. The internal walls are mainly strapped and lined with plasterboard.

Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor
	coverings were lifted.
	The floors are consistent with suspended timber. Fitted floor
	The hoors are consistent with suspended timber. Fitted hoor
	coverings restricted our inspection.

Internal joinery and kitchen	Built-in cupboards were looked into but no stored items were moved.
fittings	Kitchen units were visually inspected excluding appliances. The internal doors comprise of timber panel installations with
	painted timber skirting boards and trims. There is a modern, recently fitted kitchen, comprising base cabinets, wall mounted cabinets and a range of integrated appliances.

Chimney breasts and fireplaces	Visually inspected. No testing of the flues or fittings was carried out.
	The former fireplaces have been removed and openings sealed.

Internal decorations	Visually inspected.

Cellars	There are no cellars.
---------	-----------------------

Electricity	Accessible parts of the wiring were visually inspected without
	removing fittings. No tests whatsoever were carried out to the system
	or appliances. Visual inspection does not assess any services to make
	sure they work properly and efficiently and meet modern standards.
	If any services are turned off, the surveyor will state that in the report
	and will not turn them on.
	Mains connection.

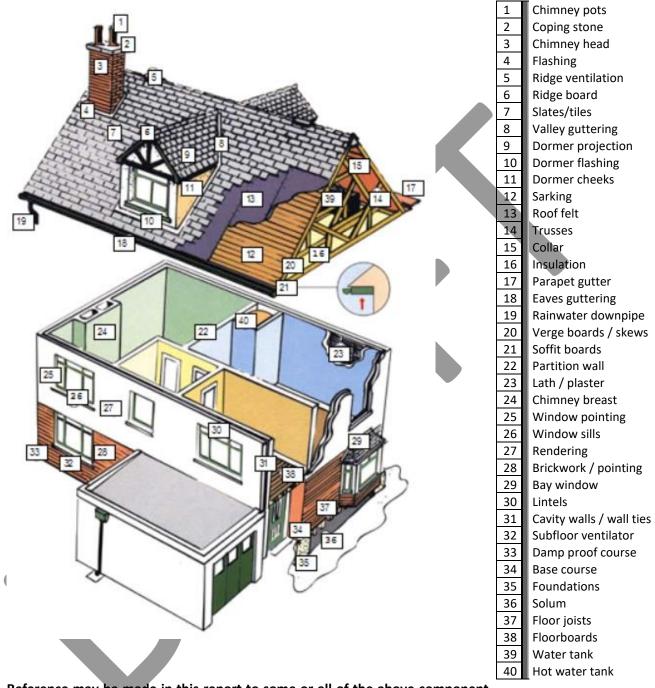

Gas	There is no mains gas supplied.

Water, plumbing, bathroom	Accessible parts of the system were visually inspected without
fittings	removing fittings. No tests whatsoever were carried out to the system
	or appliances. Visual inspection does not assess any services to make
	sure they work properly and efficiently and meet modern standards.
	If any services are turned off, the surveyor will state that in the report
	and will not turn them on.
	It should be appreciated that concealed areas beneath and around
	baths and shower trays could not be inspected. Water spillage in
	these areas can result in dampness/decay and no comment can be
	made on inaccessible areas. Waterproof seals in sanitary areas
	should be checked and maintained on a regular basis.
	Mains water. The visible plumbing comprise of copper and other
	modern materials.
	There is a modern, recently fitted, bathroom suite comprising a
	toilet, wash basin and bath with overhead electric shower.
	tonet, wash bash and bath with overhead electric shower.
Heating and hot water	Accessible parts of the system were visually inspected apart from
	communal systems, which were not inspected. No tests whatsoever
	were carried out to the system or appliances.
	There is an electric wet central heating system. The boiler is wall
	mounted within the hall cupboard, with heat distributed to the main
	apartments via water filled radiators.
	Hot water is provided via the beating system in conjunction with a
	Hot water is provided via the heating system, in conjunction with a
	pre-insulated cylinder fitted with an electric immersion heater.

Drainage	Drainage covers etc were not lifted.
	Neither drains nor drainage systems were tested.
	Presumed mains sewage connection.

Fire, smoke and burglar alarms	Visually inspected. No tests whatsoever were carried out to the syst			
	or appliances.			
	New smoke alarm standards were introduced in Scotland in February			
	2022. In instances where alarms are in place, no tests whatsoever			
	have been carried out and we cannot confirm if the system complies			
	with the most recent regulations. Any potential purchaser should			
	satisfy themselves as to whether the current system meets with			
	regulations or otherwise.			

Additional limits to inspection	Only the subject flat and internal communal areas giving access to the flat were inspected.
	If the roof space is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.
	The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.
	Our external inspection was carried out from ground level and on this basis was limited.
	Fitted floor coverings restricted our inspection and the services were not tested.
	A restricted head and shoulder inspection only was possible within the roof void. Insulation present was not lifted nor disturbed. The majority of the roof timbers could not be inspected and our report should be read in this context. It is outwith the scope of this inspection to determine whether or not asbestos based products are present within the property. Asbestos was widely used in the building industry until around 1999, when it became a banned substance. If you have any concerns you should engage the services of a qualified asbestos surveyor.
	No inspection for Japanese Knotweed was carried out and unless otherwise stated for the purpose of this report, it is assumed that there is no Japanese Knotweed within the boundaries of the property or in neighbouring properties.
	It should be appreciated that the Home Report inspection is a non- disruptive visual inspection of the property as at the date of inspection and that we are unable to inspect parts of the property which are concealed or covered by floor coverings or contents in place at that time. Once vacant, defects may be apparent that could not be detected during our survey. Changing weather conditions can also affect aspects of the property which would not be apparent at the time of inspection.

Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structur	al movement
Repair category	1
Notes	There is evidence of movement having affected the building, and noted in the form of cracking to the internal and external fabric, a run to some floors and uneven building lines. This is however not inconsistent with a property of this type and location and on the basis of a single inspection is considered to be historic and longstanding in nature.
	ess, rot and infestation
Repair category	2
Notes	There is damp stained and water damaged plaster to the walls within the communal stairwell. It is recommended a precautionary inspection of the subjects be carried out by a reputable timber and damp specialist contractor.
	There is scattered evidence of wood borer beetle within the roof void. We understand that past timber specialist repairs have been carried out and would recommend that all associated documentation be exhibited and authenticated. Where no such documentation is available, it is recommended further advice be obtained from a reputable timber specialist contractor.

Chimney	y stacks
Repair category	2
Notes	There is defective render to the north chimney head. The render to the south stack was noted to have been patch repaired, and further repairs in this nature will likely be required.
Roofing	including roof space
Repair category	2
Notes	It is understood that repairs have been completed to the roof, in conjunction with the owner of the flat beneath. The extent of documentation available should be confirmed.
	A number of chipped and displaced roof slates were noted, together with sections of raised ridging and corroded metal straps. There is no roof felt beneath the slates, with some stained timbers consistent with prior or intermittent leakage. The roof is of a type and age which will require regular and careful maintenance and it is recommended further advice be obtained from a reputable roofing contractor.
Rainwat	er fittings
Repair category	2
Notes	There is corrosion to the rainwater goods, with staining to the rear wall consistent with prior or intermittent spillage/leakage. Repairs are required.
	Where previous spillage has occurred, a precautionary check of the surrounding building fabric is recommended with particular reference to damp and other timber related defects.
Main wa	alls
Repair category	2
Notes	There are sections of cracked and bossed render (both main walls and stairwell), and some small areas of defective render. Repairs will be required during a programme of normal routine maintenance.

Windows, external doors and joinery					
Repair category	2				
Notes	There is restricted movement to several of the windows where mechanisms and other components will require adjustment as part of a programme of normal routine maintenance.				
	The timbers around and over the bay windows are weathered, with some deterioration of timber noted.				
Externa	I decorations				
Repair category	1				
Notes	Overhaul of the external decoration will be required as part of a planned programme of routine maintenance.				
Conserv	vatories / porches				
Repair category	-				
Notes	Not applicable.				
Commu	inal areas				
Repair category	1				
Notes	See section headed "Dampness, rot and infestation".				
	The external fabric of the mutual stairwell is now in need of attention.				
Garages	s and permanent outbuildings				
Repair category	2				
Notes	The store shed is considered to be fit for purpose, although the nature of construction will necessitate regular and careful maintenance. Scattered evidence of wood borer beetle was noted to the timbers.				

	e areas and boundaries
Repair category	1
Notes	The timber fences will require normal routine maintenance.
Ceilings	
Repair category	1
Notes	Cracking and blemishes have occurred and some plaster repairs may be required (during redecoration).
Interna	l walls
Repair category	1
Notes	Cracking and blemishes have occurred and some plaster repairs may be required (during redecoration).
Floors i	ncluding sub-floors
Repair category	1
Notes	There is a slight run to the floors consistent with prior movement, this is not considered to be of significant structural concern.
Interna	l joinery and kitchen fittings
Repair category	1
Notes	No immediate action or repair is required.
Chimne	y breasts and fireplaces
Repair category	1
Notes	All former fireplaces have been removed, with the openings sealed. It is presumed that these have been capped and suitably vented.

Internal	decorations
Repair category	1
Notes	The subjects are in good decorative order.
Cellars	
Repair category	-
Notes	Not applicable.
Electricit	ty
Repair category	1
Notes	The electrical system is understood to have been rewired, and was last tested in April 2023. The extent of available documentation should be confirmed. The Institution of Engineering and Technology recommends that inspections and testing are undertaken at least every ten years and on a change of occupancy. It should be appreciated that only the most recently constructed or re-wired properties will have installations which fully comply with IET regulations.
Gas Repair category	-
Notes	Not applicable.
Notes	
F Water, p	olumbing and bathroom fittings
Repair category	1
Notes	It should be appreciated that concealed areas beneath and around baths and shower trays could not be inspected. Water spillage in these areas can result in dampness/decay and no comment can be made on inaccessible areas. The waterproof seals to the sanitary goods will require continued and careful attention.

ļi .	Heating and hot water		
Repair catego	ory	1	
Notes		There is an electric wet central heating system. It is presumed that this has been installed and maintained in accordance with the manufacturers recommendations and that recent records are available. In the absence of a full service history, it is recommended that the system is checked and tested upon taking occupation.	
F	Drainag	e	
Repair catego	ory	1	
Notes		There is corrosion to the soil stack/air vents. Repairs will be required. The property is thought to be connected to a main sewer. There was no surface evidence to suggest the system is choked or leaking.	

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1]	Category 3
Dampness, rot and infestation	2		Urgent repairs or replacement are needed

Water, plumbing and bathroom fittings	1		
Heating and hot water	1		
Drainage	1		

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property: In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres: For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1.	Which floor (s) is the living accommodation on?		First Fl	oor	
2.	Are there three steps or fewer to a main entrance to a property?	Yes		No	×
3.	Is there a lift to the main entrance door of the property?	Yes		No	x
4.	Are all door openings greater than 750mm?	Yes		No	х
5.	Is there a toilet on the same level as the living room and kitchen?	Yes	X	No	
6.	Is there a toilet on the same level as a bedroom?	Yes	х	No	
7.	Are all rooms on the same level with no internal steps or stairs?	Yes	Х	No	
8.	Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes	х	No	

4. Valuation and conveyance issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

We are unaware of any adverse planning proposals affecting the subjects although this should be confirmed by obtaining a Property Enquiry Certificate.

Absolute Ownership assumed. We are unaware of any easements, servitudes or rights of way which may adversely affect the property. This point should be confirmed by reference to the Title Deeds.

The subjects form part of a block of flats and it has been assumed that maintenance and repair costs of the common parts of the building and external grounds will be shared on an equitable basis with the adjoining proprietors. It is therefore assumed that the costs of repairs detailed within this report which relate to these areas should be apportioned accordingly, although exact liability should be confirmed.

Replacement windows have been installed and compliance or otherwise with current Building and if applicable Planning Regulations should be confirmed.

It is understood that there is a private garden to the rear, laid to grass and bounded by timber fence. In addition, it is presumed that there is an area suitable for off road parking however this will require to be confirmed through reference to the title deeds/plans. The parking to the rear is approached via a private road, over which it is presumed the right of vehicle access is held. The purchasing solicitor will require to confirm that legal arrangements are adequate.

It is recommended that where repairs, defects or maintenance items have been identified, particularly categorised as a 2 or 3, interested parties make appropriate enquiries in order to satisfy themselves of potential costs and the extent of the works required prior to submitting a legal offer to purchase.

Estimated reinstatement cost for insurance purposes

£185,000

The guidance figure is the estimate of costs for reinstating the subjects as at the date if inspection based on information provided by the Building Cost Information Service (BCIS). Building costs are currently increasing significantly above inflation due to increased demand and supply issues as a result of Brexit and the pandemic. It is recommended that this figure is kept under regular review to ensure that you have adequate insurance cover.

We are of the opinion that the subjects should be insured for buildings reinstatement purposes for a sum of not less than £185,000 (One Hundred and Eighty Five Thousand Pounds Sterling).

Valuation and market comments

£125,000

We are of the opinion that the market value of the subjects all as previously described and on a vacant possession basis would be fairly stated in the region of £125,000 (One Hundred and Twenty Five Thousand Pounds Sterling).

TERMS AND CONDITIONS OF SINGLE SURVEY

GENERAL

1.1 The Surveyors

The Seller has engaged the Surveyors to provide the Report and a Generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited energy company.

The Surveyors are authorised to provide a transcript or retype of the Generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by brokers and lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the Generic Mortgage Valuation Report and the Report. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the Generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and Generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors are required to amend the valuation in consequence of such information, they will issue an amended Report and Generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and Generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon residential property. *

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's agent or relative to the Property, they will be obliged to indicate this in the adjacent box. Yes

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

* Which shall be in accordance with the current RICS Appraisal and Valuation Standards (The Red Book) and RICS Rules of Conduct.

1.2 The Report

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to the 1st of December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Report is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Report may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective Purchasers and the Purchaser and their respective professional advisors without the prior written consent of the Surveyors.

1.3 Liability

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and is prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would be (or, as the case might be, would have been) disclosed and delivered to:

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisors of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

Graham + Sibbald's total liability to the Client (and any third party relying upon this report) under this Agreement (including liability in contract, tort (including negligence), breach of statutory duty, or otherwise) shall be limited to the lower of the following : a) 25% of the valuation or b) \pm 250,000.

1.4 Generic Mortgage Valuation Report

The Surveyors undertake to the Seller that they will prepare a Generic Mortgage Valuation Report, which will be issued along with the Report. It is the responsibility of the Seller to ensure that the Generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 Transcript Mortgage Valuation for Lending Purposes

The Surveyors undertake that on being asked to do so by a prospective Purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. ** The Transcript Mortgage Valuation Report for Lending Purposes will be prepared from information contained in the Report and the Generic Mortgage Valuation Report.

** Which shall be in accordance with the current RICS Appraisal and Valuation Standards (The Red Book) and RICS Rules of Conduct.

1.6 Intellectual Property

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 Payment

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports, including replacement home reports.

1.8 Cancellation

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the Property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the Property, the Surveyor concludes that the Property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the following paragraph of this section.

In the case of cancellation by the Seller, for whatsoever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

If our account details change, we will notify these to you by letter or face to face and never by email.

1.9 Precedence

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 Definitions

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a Surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is the estimated amount for which the Property should exchange, on the date of valuation, between a willing seller and a willing buyer in an arm's length transaction after proper marketing where the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in Part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property;
- the "Surveyors" are Graham + Sibbald LLP, a limited liability partnership incorporated in Scotland (Registered Number SO307130) and having its registered office address at Seabraes House, 18 Greenmarket, Dundee, DD1 4QB, of which the Surveyor is an employee, director or member (unless the Surveyor is not an employee, director or member, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report; and
- the "Energy Report" is the advice given by the accredited energy company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.
- "Data Protection Legislation" means the UK Data Protection Legislation and any other European Union legislation relating to personal data and all other legislation and regulatory requirements in force from time to time which apply to a party relating to the use of personal data (including, without limitation, the privacy of electronic communications).
- "UK Data Protection Legislation" means all applicable data protection and privacy legislation in force from time to time in the UK including the UK GDPR; the Data Protection Act 2018; the Privacy and Electronic Communications Directive 2002/58/EC (as updated by Directive 2009/136/EC) and the Privacy and Electronic Communications Regulations 2003 (SI 2003/2426) as amended.
 - "UK GDPR" has the meaning given to it in section 3(10) (as supplemented by section 205(4)) of the Data Protection Act 2018.

5 Forerow Cottage Caputh Perth PH1 4JE

Perth PER-2023\10\0002 Inspection Date:- 04/10/2023 First Inspection Date (if applicable):-

DESCRIPTION OF THE REPORT

2.1 The Service

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by statute and this is in the format of the accredited energy company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 The Inspection

The inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the Property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the Property.

The inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the Report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Report of Property that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a register of asbestos and effective management plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 The Report

The Report will be prepared by the Surveyor who carried out the Property inspection and will describe various aspects of the Property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the Property will be concise and will be restricted to matters that could have a material affect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the Property is free of any other minor defects.

Throughout the Report the following repair categories will be used to give an overall opinion of the state of repair and condition of the Property:

2.3.1 Category 3:

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the Property or cause a safety hazard. Estimates for repairs or replacement are needed now.

2.3.2 Category 2:

Repairs or replacement requiring future attention, but estimates are still advised.

2.3.3 Category 1

No immediate action or repair is needed.

WARNING:

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the Property. This is particularly true during slow market conditions when the effect can be considerable. Parts of the Property which cannot be seen or accessed will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 Services

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 Accessibility

A section is included to help identify the basic information interested parties need to know to decide whether to view a Property.

2.6 Energy Report

A section is included that makes provision for an Energy Report, relative to the Property. The Surveyor will collect physical data from the Property and provide such data in a format required by an accredited Eeergy company. The Surveyor cannot of course accept liability for any advice given by the energy company.

2.7 Valuation & Conveyancer Issues

The last section of the Report contains matters considered relevant to the conveyancer (solicitor). It also contains the Surveyor's opinion both of the market value of the Property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation within a willing buyer and willing seller in an arms-length transaction after proper marketing wherein the parties have each acted knowledgably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of uninspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions.
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a re-inspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

It is assumed that any relevant Local Authority consents, warrants and completion certificates have been obtained where construction or alteration works have been undertaken.

This agreement and any dispute or claim arising out of or in connection with its subject matter shall be governed by and construed in accordance with the laws of Scotland, and the Scottish Courts will have exclusive jurisdiction to hear such claims.

DATA PROTECTION

Graham + Sibbald and the Client each undertake that:

(a) they shall comply with all applicable requirements of the Data Protection Legislation, including without limitation any obligations relating to the rights of a data subject and the reporting of personal data breaches (all as defined in the UK GDPR); and

(b) not do or omit to do anything which puts any other party to the Agreement in breach of the Data Protection Legislation.

Without prejudice to the generality of this clause, you shall ensure that you have all necessary appropriate consents and notices in place to enable lawful transfer of the personal data to Graham + Sibbald for the duration and purposes of this Agreement. You shall have liability for and shall indemnify Graham + Sibbald for any loss, liability, costs (including legal costs), damages, or expenses resulting from any breach by you of the Data Protection Legislation. For further information regarding how Graham + Sibbald processes personal data in relation to this Agreement, please see Graham + Sibbald's privacy notice at https://www.g-s.co.uk/privacy-policy/.
